

Timetable for Home School Studying

Teachers will be setting work to enable pupils to learn from home, so your child will be able to access work online through Microsoft Teams. They have been shown how to use this in Guided Study Time and there are guides available on our website to help both pupils and parents/carers to access the lessons online. Teachers will be checking Teams and their emails regularly to ensure any work, which has been submitted is marked and feedback is given when appropriate. Please encourage your child to follow the programme below and to complete the work for the subjects set by encouraging them to adhere to the timetable for their year group, where possible. It is important that we work together to ensure our pupils are still learning whilst at home.

Years 9, 10 and 11 please note that in the periods where it states 'Options Subject' you should choose one of the option subjects that you study from your own timetable. Make sure you spread out your subjects so you have a balance suited to how you learn.

It is important that teachers, parents and carers stay in regular contact with each other whilst the academy is closed to ensure our pupils remain focused and engaged in their learning. Please help your child, where possible, to adhere to the timetable and to complete the work as effectively as they can. We will support both you and your child in any way that we can to ensure they still have access to their education and more importantly make progress in their learning. To our pupils, please plan your time, work hard and most importantly build in breaks to look after your mental and physical well-being.
